CORNICES

OUR CORNICES ARE
MANUFACTURED
FROM HIGH DENSITY
XPS POLYSTYRENE

- **Classical XPS
Cornice**

XPS is a high-density polystyrene aimed at the professional installer who is looking for a thicker more rigid cornice with a beautiful smooth finish, this would usually need only one coat of paint and it is ready to install.

- **LED Cornice**

Cornice warehouse has designed and developed the very first cornices and uplighters in South Africa to accommodate LED strip lighting.

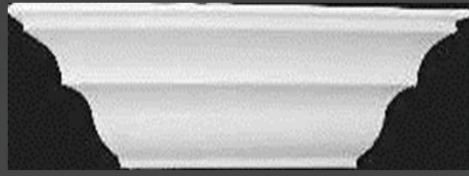

Classic XPS Cornices

LED and uplighter Range

Manufactured from high density polystyrene, our cornices and uplighters are affordable, always in stock, and extremely easy to install. From single walls requiring some accent lighting to entire homes wanting a cornice with concealed lighting, our range brings this within easy reach of everyone.

LED

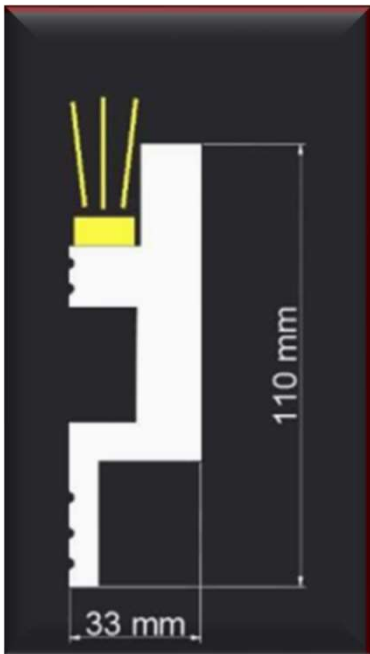

Based on the same design as our top selling Jasper cornice. Installs the same as a standard cornice but with the option of installing strip lighting.

Based on the same design as our top selling Step 3 cornice.

UPLIGHTER

A stunning addition to the lighting in your home!

Please note that these are NOT cornices, as they do not go all the way to the ceiling. They are for mood lighting and throw a lovely wash of light onto your ceilings.

Dado Rails

**Polyurethane and Stone Dado
Rails are the perfect finish to
your home!**

These classic rails and architraves have a superior smooth finish, are water resistant, paintable and easy to install. These can be used as an architrave or as a decorative wall or ceiling finish.
